Trent and Remy:

Having been in the port industry business with respect to strategic equipment procurement, project management and delivery for a few decades now, Trent and Remy have realised the need for a truly seamless one-stop service.

All of this managed in the Trent / Remy internationally proven and industry acclaimed iSpec port procurement and project management solution.

All of the above can be delivered as part of a single CAPEX budget, and the awarded supplier / winning bidder pays for this specialised 'One-Stop | Turn-Key' service as a simple and small percentage of the awarded cost!

Today, there is no real competitive operational or price edge on crane designs. Every terminal operator enjoys the same benefits that the industry has to offer, regardless of whether you are big or small.

So why not take a closer look at lowering those headcount costs, pay only when you need the service, and still maintain absolute confidentiality in-line with your business requirements.

Leave this headache at someone else's door, whilst you focus on your core business in delivering supply chain perfection to your customers.
